

The industrial water treatment reference

ION EXCHANGE, FILTRATION, MEMBRANE SEPARATION, ULTRA-VIOLET, ELECTRODEIONIZATION, OZONE ...

Power

Customer : Incineration plant
Area : Le Havre/France
Description : Demineralized water production (ultrapure) for high pressure steam generator

Comments :
Automatic sand filters, up-flow demineralization 2x15 m³/h
HCl Storage, soda storage, Neutralisation, Gas washing
Ultrapure demineralized water Storage and distribution.

Customer : Incineration plant
Area : Pontmain/France
Description : Demineralized water Production

Comments :
2 lines of demineralization (ions exchange)
Flow rate : 2 x 6 m³/h

Customer : Incineration plants
Area : Besançon/France
Description : Demineralized water Production

Comments :
2 lines of demineralization
Flow rate : $2 \times 10 \text{ m}^3/\text{h}$

Customer : Mining plants
Area : Prony/New Caledonia
Description : Demineralized water production
for high pressure steam generator

Comments :
Decantation + Automatic Filtration + Activated carbon Filtration +
Up-flow Demineralization $20 \text{ m}^3/\text{h}$ +
Mixed bed $20 \text{ m}^3/\text{h}$

Customer : Printing
Area : Corbeil/France
Description : Reverse osmosis for steam generator 20 bar

Comments :
Reverse Osmosis 10 m³/h

Customer : Diesel engine power station
Area : Darhla/Marocco
Description : Demineralized water Production

Comments :
Demineralization duplex 5 m³/h

Customer : Chemicals plant

Area : Beauvais/Oise

Description : Reverse osmosis for steam generator 20 bar

Comments :

Reverse osmosis 10 m³/h

Customer : Metal steel

Area : St Chely d'Apcher/Lozère

Description : Water Filtration for cooling tower

Comments :

Sand filters 110 m³/h

Customer : Incineration plant

Area : Belgique

Description : Demineralized water production

Comments :

Single layer filtration 30 m³/h + 2 double-layers filters 15 m³/h

Demineralized water production by ions exchange 2 x 10 m³/h

Customer : Power production

Area : High Corsica/France

Description : Demineralized water production

Comments :

Pre-treatment + double-pass reverse osmosis 15 m³/h

mounted on skid

Customer : High pressure Steam Generator
Area : Normandy/France
Description : High demineralized water production

Comments :
Pre-treatment + Electrodeionization 60 m³/h
+ 2 reverse osmosis units of 35 m³/h.
First plant in France designed with VNX moduls.

Customer : Power plant
Area : Darlha/Morocco
Description : Demineralized water production

Comments :
Pre-treatment + double-pass reverse osmosis 1 m³/h mounted
in container

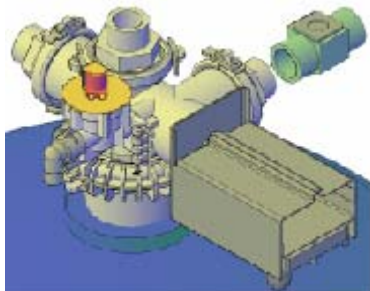

Customer : Incineration plant
Area : Roosendaal/The Netherlands
Description : Demineralized water production for high pressure steam generator

Comments :
Demineralized Water production by EDI + Reverse Osmosis 10 m³/h

Customer : Clean Water plant
Area : Martinique/France
Description : Filtration skid

Comments :
Sand Filter 25 m³/h

Customer : Gas production
Area : Dougga/Tunisia
Description : Demineralized Water Production

Comments :
Pre-treatment by filtration, softening, dechlorination
Demineralized Water Production by reverse osmosis 15 m³/h
